

SIZE GUIDE BRACELET

If you are not able to print this size guide, you can use another material or object that can wrap around your wrist. Simply use it to find the right tightness, measuring its length in centimetres for your wristband size.

1

When printing this document please make sure that the document is not scaled (**printed at 100% true size**).

2

Print this document at **100% scale** and cut along the dotted lines. You will have a rectangular strip resembling a watch with a ruler next to it and aubergine bar at the top.

3

Place the image of the watch dial on the outside of your wrist. Wrap the ruler around your wrist, similar to how tight you want your watch to fit.

4

Once the ruler is in the right position, take note of the number next to the aubergine line: this is the size of the wristband that you should choose.
